

# User Manual - Thesis Website

## 1 Login Page

The first page is the login page, which includes a link to register. If you already have an account, you can log in directly using your email and password, or use the Google button for a simpler login experience.

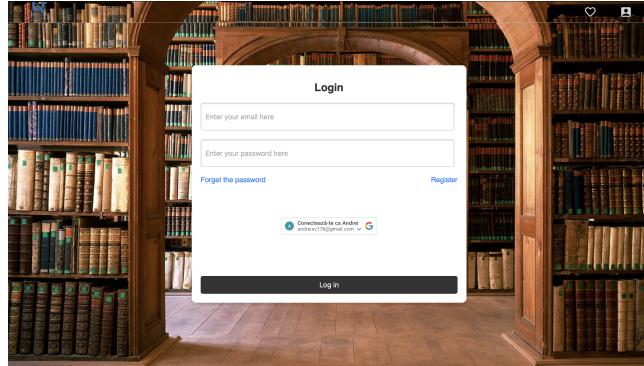

Figure 1: Login Page

## 2 Registration

Here, you need to choose one of the two account types. If you are a student, click on the student icon; if you are a professor, click on the professor icon. After that, you will see a registration form specific to the selected account type. You can register using your Gmail account, but it is mandatory to provide the following details:

- **For students:** Faculty, study program, and year of study.
- **For professors:** Faculty and program (optional).

Alternatively, you can manually enter all the required information.

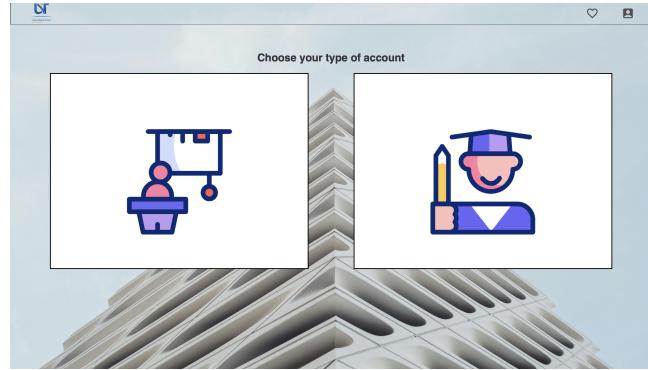

Figure 2: Student Registration Page

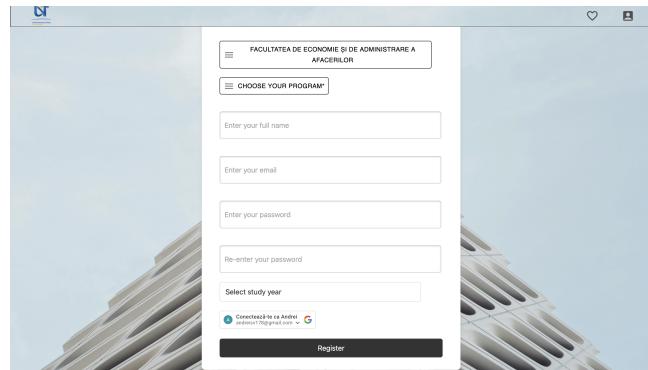

Figure 3: Professor Registration Page

### 3 Email Confirmation

After registering, you will receive a confirmation code via email, along with the terms and conditions. You need to enter this code on the website to complete and confirm your registration.

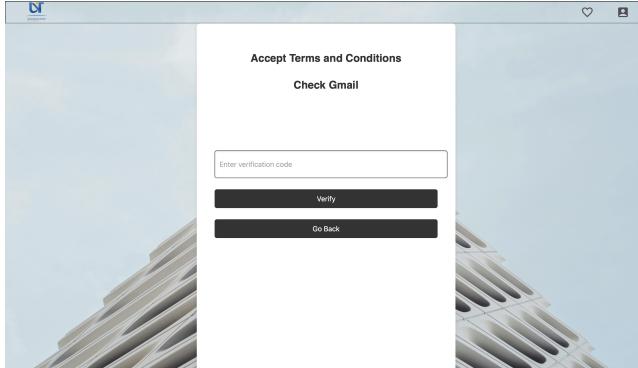

Figure 4: Confirmation Page

## 4 Student Account

The first page you encounter is the main page, where all thesis topics posted by professors from your faculty are displayed. At the top of the page, there are several buttons with different functionalities:

- **All** – This tab shows all available thesis topics. If you are interested in a particular thesis, you can click on it to view more detailed information. You will also see an **Apply** button and a **Favorite** icon, which allows you to save the thesis for later. To apply, simply click the button, and a form will appear where you can write a cover letter (optional, depending on the professor's preferences). See the image below:

Title	Faculty	Professor	Requirements	Deadline
Thesis NR 1	Facultatea de Matematică și Informatică	andrei	requisit	01/06/2025

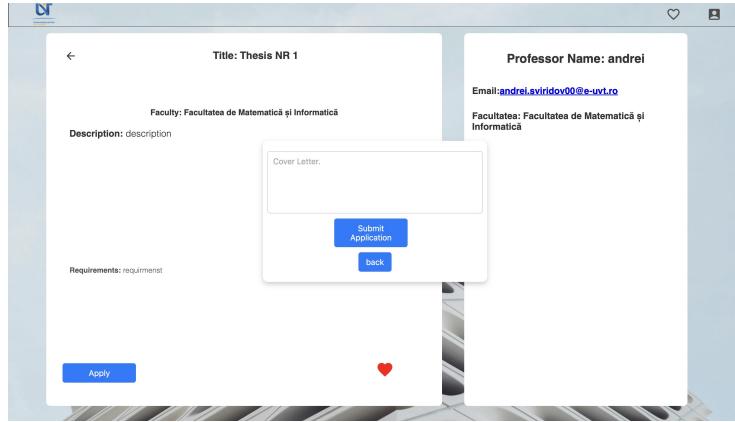

Figure 6: Apply to a Thesis

- **My Proposals** – In this section, there is a button on the bottom-right corner. Clicking it opens a form where you can propose your own thesis topic. You must select a professor by name and fill in the required information. Once submitted, the proposal is sent directly to the selected professor. You can also remove a proposal, but only before it is accepted.

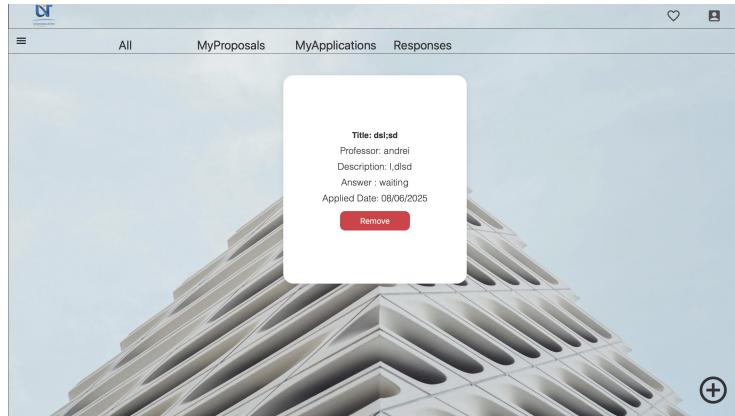

Figure 7: Propose a Thesis Topic

If you click on a card with your proposal, you will see full information and a chat window where you can communicate with the professor – for instance, to provide additional details or answer questions related to your proposed topic.

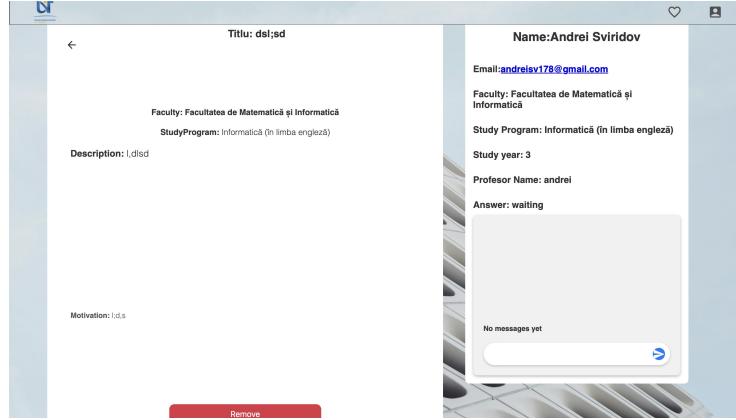

Figure 8: Proposal Details and Chat

- **My Applications** – This section displays cards with all the thesis topics you have applied to. If you are no longer interested in a thesis, you can delete your application, as long as it has not yet been accepted.
- **Responses** – Here, you will see all the thesis topics where a professor has accepted your application or proposal. You are required to choose only one and confirm your participation. Once confirmed, the professor will receive a confirmation email, and you will no longer be able to apply or propose to any other thesis topics.

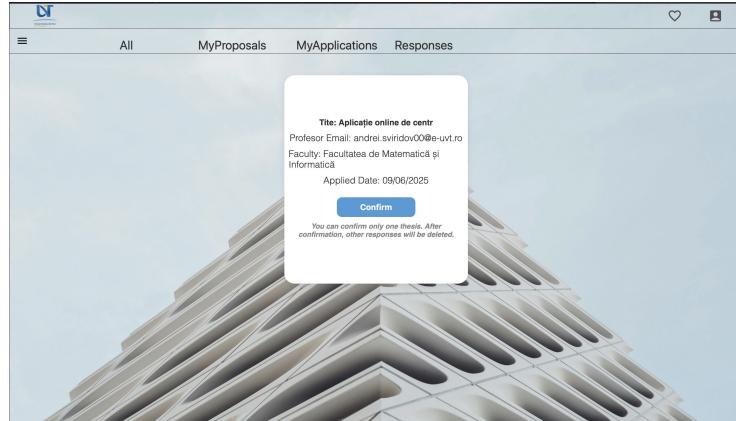

Figure 9: Confirm Thesis Participation

- **My Thesis** – This button appears in the final step, after you have confirmed your participation in a thesis topic. When you click on it, you will see another chat window between you and the professor, along with

detailed information about your assigned thesis. This allows you to communicate throughout the entire development process of the thesis.

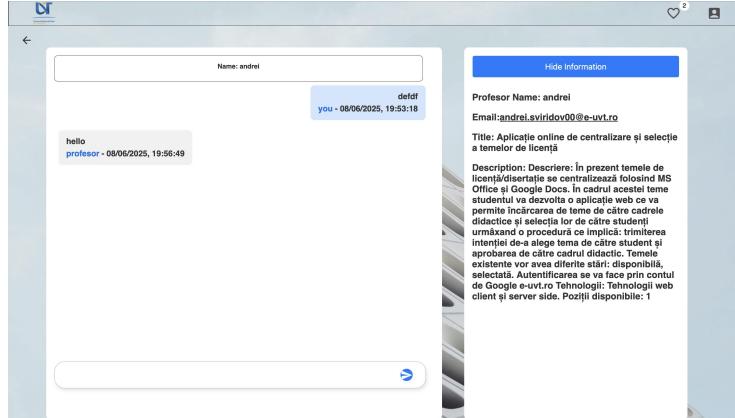

Figure 10: Final Thesis Chat and Information

## 5 Professor Account

If you registered as a professor, you may automatically gain full functionality if your name is found in the faculty's official list of professors. Otherwise, you will need to wait until the administrator grants you access.

Once approved, a button will appear in the bottom-right corner that allows you to add a new thesis topic. When adding a thesis, you can specify whether a cover letter is mandatory and set the maximum number of students that can apply, to avoid exceeding capacity.

You will also see slightly different buttons than students:

- **All** – This tab shows all posted thesis topics. You can click on each card to view more detailed information.

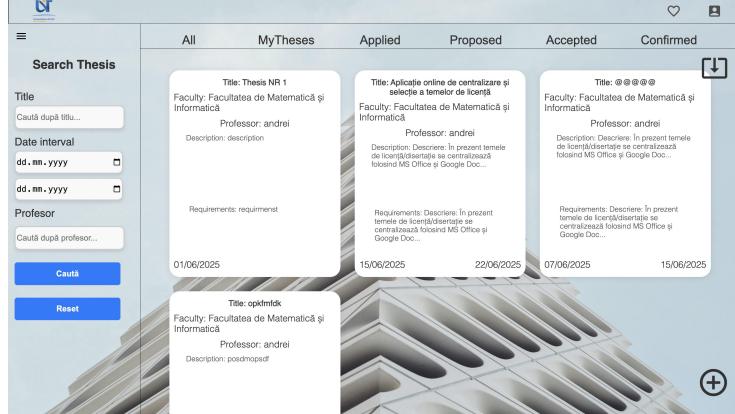

Figure 11: All Thesis Topics View (Professor)

Like students, you also have access to a search bar located in the top-left corner. You can use it to filter thesis topics by title, date, or professor name.

- **My Theses** – Here, you can view all the thesis topics you've uploaded. You can modify, suspend, or permanently delete them. To edit a thesis, click on it, make the necessary changes in the form, and press the "Modify" button to save your updates. Deleting a topic removes it from all lists in the application.

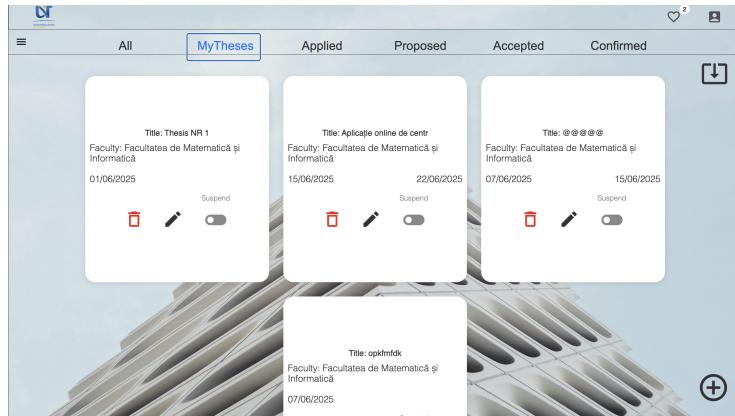

Figure 12: All Thesis Topics View (Professor)

- **Applied** – This section shows all the students who have applied to your topics. Clicking on a student's card will display more information, including their optional cover letter if provided. You can then choose to **Accept** or **Reject** the application.

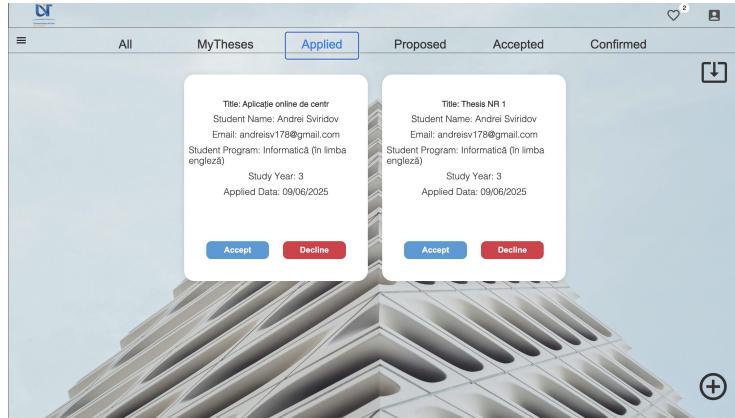

Figure 13: Applications Received

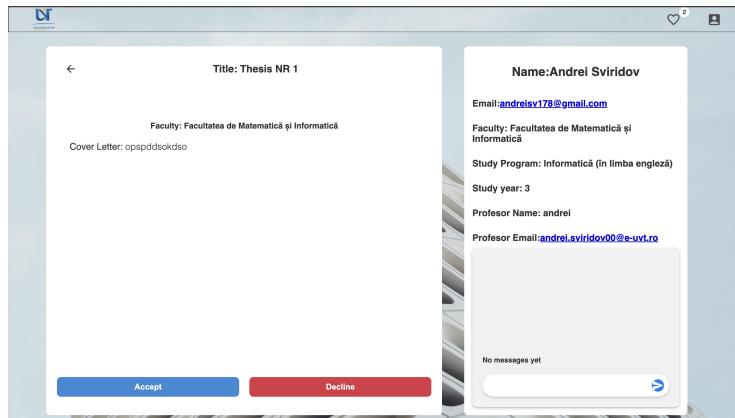

Figure 14: Application Details

If you accept a student, they will receive an email notification. The topic will then appear in the **Accepted** list and wait for the student to confirm participation. Once confirmed, the topic moves to the **Confirmed** section, where both you and the student can access a shared chat to communicate.

If you reject a student, they will be notified via email as well.

- **Proposed** – This section displays thesis proposals submitted by students. You can click on each proposal to view full details. You also have access to the chat, where you can ask follow-up questions before choosing to accept or reject the proposal.??

## 6 Admin Account

This is a special role, and there can only be one admin account. The admin has personal login credentials and has access to all faculties, being able to view all professors and students.

The admin only needs to select the faculty they wish to view, and the system will display a list of professors, students, theses, and confirmed topics. To access this information, the admin must click the corresponding button.

For each professor, there are two buttons available: **Delete** and **Grant Access**. The **Grant Access** button is used to manually grant full functionality in cases where the account has not passed the automatic confirmation process. Please note that these rights cannot be revoked if the account becomes corrupted or for other technical reasons.

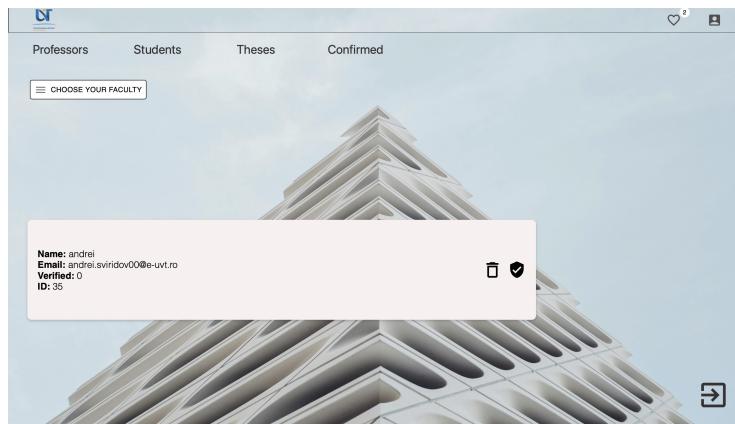

Figure 15: Professor Management Interface

For each thesis, there are three available actions: **Delete**, **Modify**, and **Extend** (to view full details of the thesis).

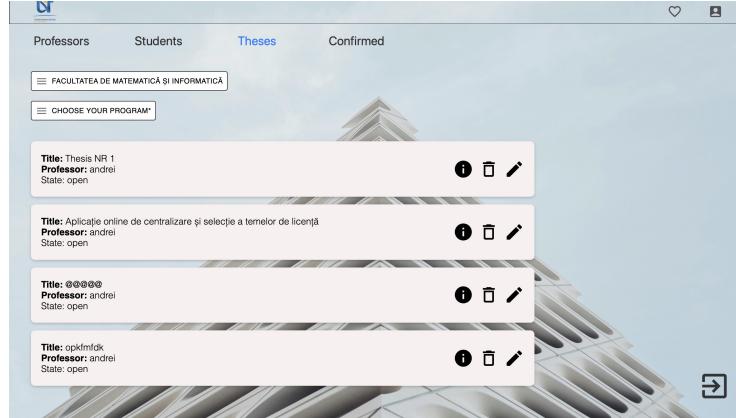

Figure 16: Thesis Management Interface

Below is the thesis modification form. It is identical to the form used for professors, with the only difference being that the admin has access to every thesis topic uploaded to the platform.

A screenshot of the thesis modification form. The form is divided into two main sections. The left section contains fields for 'Title' (set to 'Thesis NR 1'), 'Description' (containing the placeholder 'description'), and 'Requirements' (containing the placeholder 'requirement'). Below these fields is a blue 'Modify' button. The right section contains three input fields: 'Limit' (set to '2'), 'Date From' (set to '31/05/2025'), and 'Date To' (set to '10/06/2025'). The background features a large, semi-transparent image of a modern building's facade.
